github.com/javierevans | javier-evans.vercel.app

Computer Science student seeking a Software Engineering Internship (Full-Stack Focus). Strong foundation in React development, state management, component architecture, and database design principles.

## EDUCATION

**Mercer County Community College** — Trenton, NJ

Associate of Science in Computer Science | Expected May 2026

Relevant Coursework: Discrete Mathematics, Linear Algebra, Data Structures, Computer Science I & II, Object-Oriented Programming

## TECHNICAL SKILLS

**Languages:** Java, C, JavaScript, SQL

**Web:** HTML, CSS | **Frameworks:** React, Astro, Tailwind

**Tools:** Git, GitHub, VS Code, CLion

**Concepts:** OOP, Data Structures, Algorithms, Responsive Design, Database Design

## PROJECTS

### Garden Planner App (In Progress)

- Built dynamic React application with modular component architecture
- Implemented customizable grid system with state-driven UI updates
- Integrated localStorage persistence for user configurations
- Applied clean component separation for scalable code structure

### Personal Portfolio Website

- Developed responsive portfolio using Astro with reusable components
- Implemented modern UI styling and smooth navigation
- Deployed optimized production build using Vercel

## EXPERIENCE

### Ewing Sports — Shirt Printing Assistant (2019)

- Operated heat press equipment for custom apparel production
- Managed customer orders and met shipping deadlines
- Maintained quality control standards

### Soccer Shots — Youth Soccer Coach (2021–2023)

- Led training sessions for children ages 4–11
- Developed drills to improve coordination and teamwork
- Maintained safe and engaging learning environment

## PROFESSIONAL STRENGTHS

- Quick learner with strong problem-solving mindset
- Flexible team contributor who adapts to evolving needs
- Demonstrated leadership and communication skills
- Reliable with strong time management skills
